

Task1:Filesystem Interaction on Linux machine.

Commands for interaction with the Filesystem to allow us to:

- Create files and folders
- Move files and folders
- Delete files and folders

Command	Full Name	Purpose
touch	touch	Create File
mkdir	Make directory	Create a folder
cp	copy	Copy a file or folder
mv	Move	Move a file or folder
rm	remove	Remove a file or folder
file	file	Determine the type of a file

Examples:

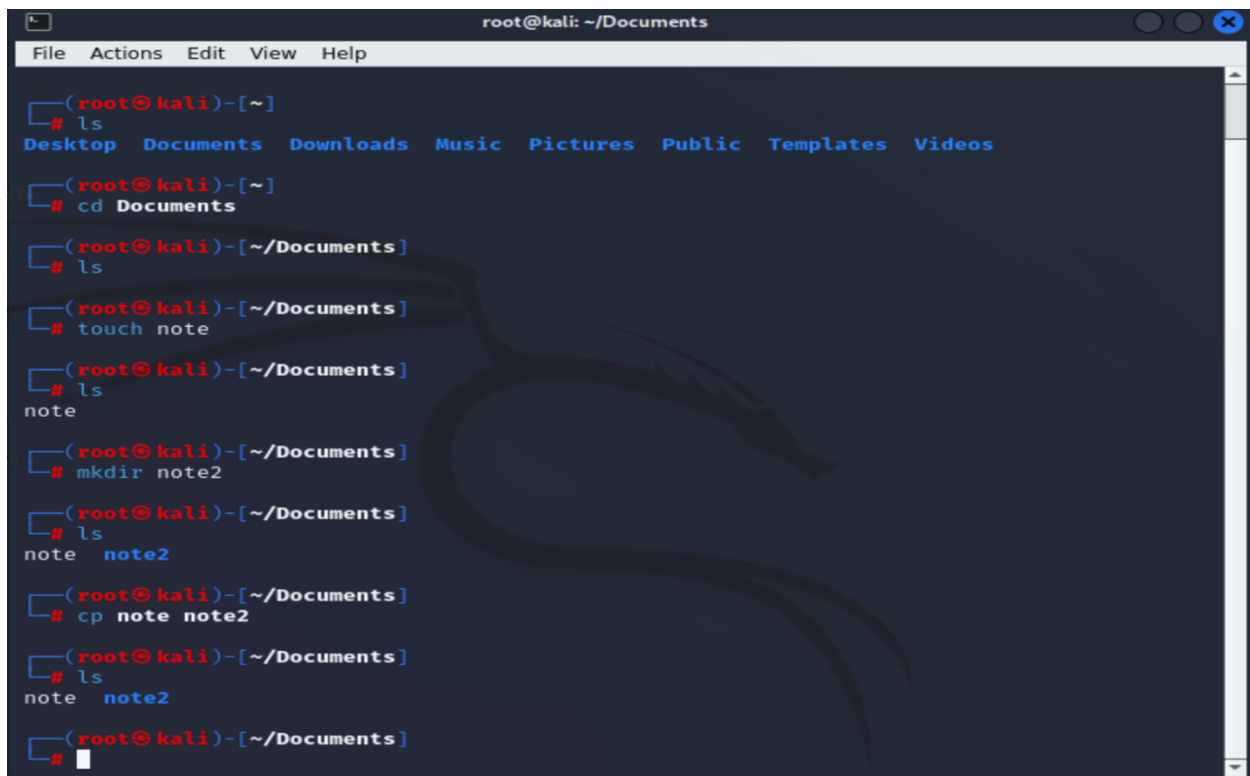

touch note

mkdir note

cp note note2

mv note2 note3

rm note

A screenshot of a terminal window titled 'root@kali: ~/Documents'. The window shows a series of commands and their outputs. The commands are: 'ls' (showing desktop directories), 'cd Documents' (changing to the Documents directory), 'ls' (showing the current directory is empty), 'touch note' (creating a file named note), 'ls' (showing 'note'), 'mkdir note2' (creating a directory named note2), 'ls' (showing 'note' and 'note2'), 'cp note note2' (copying the file note to note2), and 'ls' (showing 'note' and 'note2'). The terminal has a dark background with a faint dragon logo. The window has a menu bar with 'File', 'Actions', 'Edit', 'View', and 'Help'.
